PROFESSIONAL SUMMARY

A fourth-year Computer Science student pursuing a double specialization in *Data Science and Analytics (DSA)* and *Enterprise Systems (ES)*, seeking opportunities to gain hands-on experience in data science applications, software development, and real-world system implementation.

EDUCATION

Ateneo de Manila University

Bachelor of Science in Computer Science | GPA: 3.77/4.00

Specialization in Data Science and Analytics (DSA) and Enterprise Systems (ES)

August 2023 – May 2027

Quezon City, PH

- Honors: Magna Cum Laude Standing; Consistent Dean's Lister
- Scholarships: Ateneo Director's List Scholar (Top 150 Ateneo applicants); DOST-SEI JLSS Merit Scholar

AWARDS

Grand Champion - Information Management Summit 2026 (Business Case Competition)

- Architected a digital transformation roadmap for an LGU, leveraging an MDM system for the centralization of data across two AI-integrated solution modules: e-Services Modernization and Smart Disaster Risk Management.

WORK AND ORGANIZATIONAL EXPERIENCE

Incoming Supply Chain - Integrated Planning Intern

Unilever Philippines

September 2026 – November 2026

Taguig City, PH

Fraud Projects and Analytics - Apprentice Program Intern

Shopee Philippines Inc.

June 2026 – August 2026

Mandaluyong City, PH

- Collaborated cross-functionally with multiple teams to identify opportunities where targeted fraud rules could mitigate bad actor behavior.
- Researched, designed, and proposed a novel fraud detection rule leveraging linkage signals and account behavior to uncover hidden prohibited listings and bad actors attempting to evade existing detection methods.
- Conducted data-driven impact assessments and feasibility testing on the proposed rule, demonstrating its ability to flag risky seller accounts and previously undetected prohibited listings.

IT Skills and Development Officer

Ateneo Management Information Systems Association

October 2025 – May 2026

Quezon City, PH

- Created and facilitated technical training modules for 30+ internal team members and external participants, mentoring attendees and providing hands-on support to reinforce learning.
- Led a team of four developers using Agile methodologies, delivering two website projects on schedule and improving workflow efficiency through cross-functional collaboration.

SKILLS

Programming: Python, SQL, R, JavaScript, Java, C++

Data Science and Engineering: Tableau, Power BI, pandas, NumPy, Matplotlib, Plotly, scikit-learn, PyTorch, PySpark, Spark MLlib, Spark SQL, Hadoop, Hive, HBase, Applied Machine Learning, Natural Language Processing

Web Frameworks: React, Next.js, Flask, Django, Node.js, Express

Tools: Git, Linux (CLI), Microsoft Excel, Google Cloud Platform (GCP), Google Dataproc, BigQuery, Apache Iceberg

PROJECTS

DPWH Transparency Dashboard | *Python, Streamlit, pandas, NumPy, scikit-learn*

- Developed and trained machine learning models including Isolation Forest for anomaly detection and Random Forest for initial risk scoring to identify irregularities in public infrastructure project data.
- Built an interactive data visualization dashboard using Streamlit, enabling users to monitor project transparency, explore risk insights, and detect potential anomalies.

Mapping News Coverage of Marcos' First Six Months (2025) | *Python, scikit learn, NLTK, AutoMap, ORA*

- Performed LDA topic modeling (Python, scikit-learn, NLTK) and social network analysis (AutoMap, ORA) on 2025 news articles about Marcos Jr. to uncover monthly shifts in dominant themes, key actors, and information flows.
